LISTING OF CLAIMS

1. (original) A golf club head in which when a horizontal direction from a toe side toward a heel side is set to be an X direction, a vertical and upward direction is set to be a Y direction, coordinates of a center of a hitting surface are set to be (0, 0) and coordinates of a maximum resilience point in the hitting surface are set to be (x, y), y is greater than 0 mm and is equal to or smaller than 10 mm.

2. (original) The golf club head according to claim 1, wherein the y is 5 mm to 8 mm.

3. (original) The golf club head according to claim 1, wherein a value of (t2 − t1) on the center of the hitting surface which is measured in accordance with a pendulum test determined by USGA is smaller than $250 \cdot 10^{-6}$ second.

4. (original) The golf club head according to claim 1, wherein the value of (t2 − t1) on the maximum resilience point which is measured in accordance with the pendulum test determined by the USGA is $250 \cdot 10^{-6}$ second or more.

5. (withdrawn) A golf club head in which when a horizontal direction from a toe side toward a heel side is set to be an X direction, a vertical and upward direction is set to be a Y direction, coordinates of a center of a hitting surface are set to be (0, 0) and coordinates of a maximum resilience point in the hitting surface are set to be (x, y), y is equal to or greater than -5 mm and is smaller than 0 mm.

6. (withdrawn) The golf club head according to claim 5, wherein the y is -5 mm to -2 mm.

7. (withdrawn) The golf club head according to claim 5, wherein a value of (t2 − t1) on the center of the hitting surface which is measured in accordance with a pendulum test determined by USGA is smaller than $250 \cdot 10^{-6}$ second.

8. (withdrawn) The golf club head according to claim 5, wherein the value of (t2 − t1) on the maximum resilience point which is measured in accordance with the pendulum test determined by the USGA is $250 \cdot 10^{-6}$ second or more.

9. (withdrawn) A golf club head in which when a horizontal direction from a toe side toward a heel side is set to be an X direction, a vertical and upward direction is set to be a Y direction, coordinates of a center of a hitting surface are set to be (0, 0) and coordinates of a maximum resilience point in the hitting surface are set to be (x, y), x is equal to or greater than -10 mm and is smaller than 0 mm.

10. (withdrawn) The golf club head according to claim 9, wherein the x is -8 mm to -3 mm.

11. (withdrawn) The golf club head according to claim 9, wherein a value of $(t2 - t1)$ on the center of the hitting surface which is measured in accordance with a pendulum test determined by USGA is smaller than $250 \cdot 10^{-6}$ second.

12. (withdrawn) The golf club head according to claim 9, wherein the value of $(t2 - t1)$ on the maximum resilience point which is measured in accordance with the pendulum test determined by the USGA is $250 \cdot 10^{-6}$ second or more.

13. (withdrawn) A golf club head in which when a horizontal direction from a toe side toward a heel side is set to be an X direction, a vertical and upward direction is set to be a Y direction, coordinates of a center of a hitting surface are set to be (0, 0) and coordinates of a maximum resilience point in the hitting surface are set to be (x, y), x is greater than 0 mm and is equal to or smaller than 10 mm.

14. (withdrawn) The golf club head according to claim 13, wherein the x is 3 mm to 8 mm.

15. (withdrawn) The golf club head according to claim 13, wherein a value of $(t2 - t1)$ on the center of the hitting surface which is measured in accordance with a pendulum test determined by USGA is smaller than $250 \cdot 10^{-6}$ second.

16. (withdrawn) The golf club head according to claim 13, wherein the value of $(t2 - t1)$ on the maximum resilience point which is measured in accordance with the pendulum test determined by the USGA is $250 \cdot 10^{-6}$ second or more.

ADM/FRH/

17. (currently amended) A golf club head in which when a horizontal direction from a toe side toward a heel side is set to be an X direction, a vertical and upward direction is set to be a Y direction, coordinates of a center of a hitting surface are set to be (0, 0) and coordinates of a maximum resilience point in the hitting surface are set to be (x, y), and wherein

the maximum resilience point is displaced from the coordinates (0, 0);

y is equal to or greater than -5 mm and is equal to or smaller than 10 mm, and x is equal to or greater than -10 mm and is equal to or smaller than 10 mm;

a value of (t2 – t1) on the center of the hitting surface which is measured in accordance with a pendulum test determined by USGA is smaller than $250 \cdot 10^{-6}$ second; and

the value of (t2 – t1) on the maximum resilience point which is measured in accordance with the pendulum test determined by the USGA is $250 \cdot 10^{-6}$ second or more.

18. (new) The golf club head according to claim 17, wherein the y is -5 mm to -2 mm.

19. (new) The golf club head according to claim 17, wherein the x is -8 mm to -3 mm.

20. (new) The golf club head according to claim 17, wherein the x is 3 mm to 8 mm.
